MEMORANDUM FOR: Deputy Director for Administration

25X1

FROM:

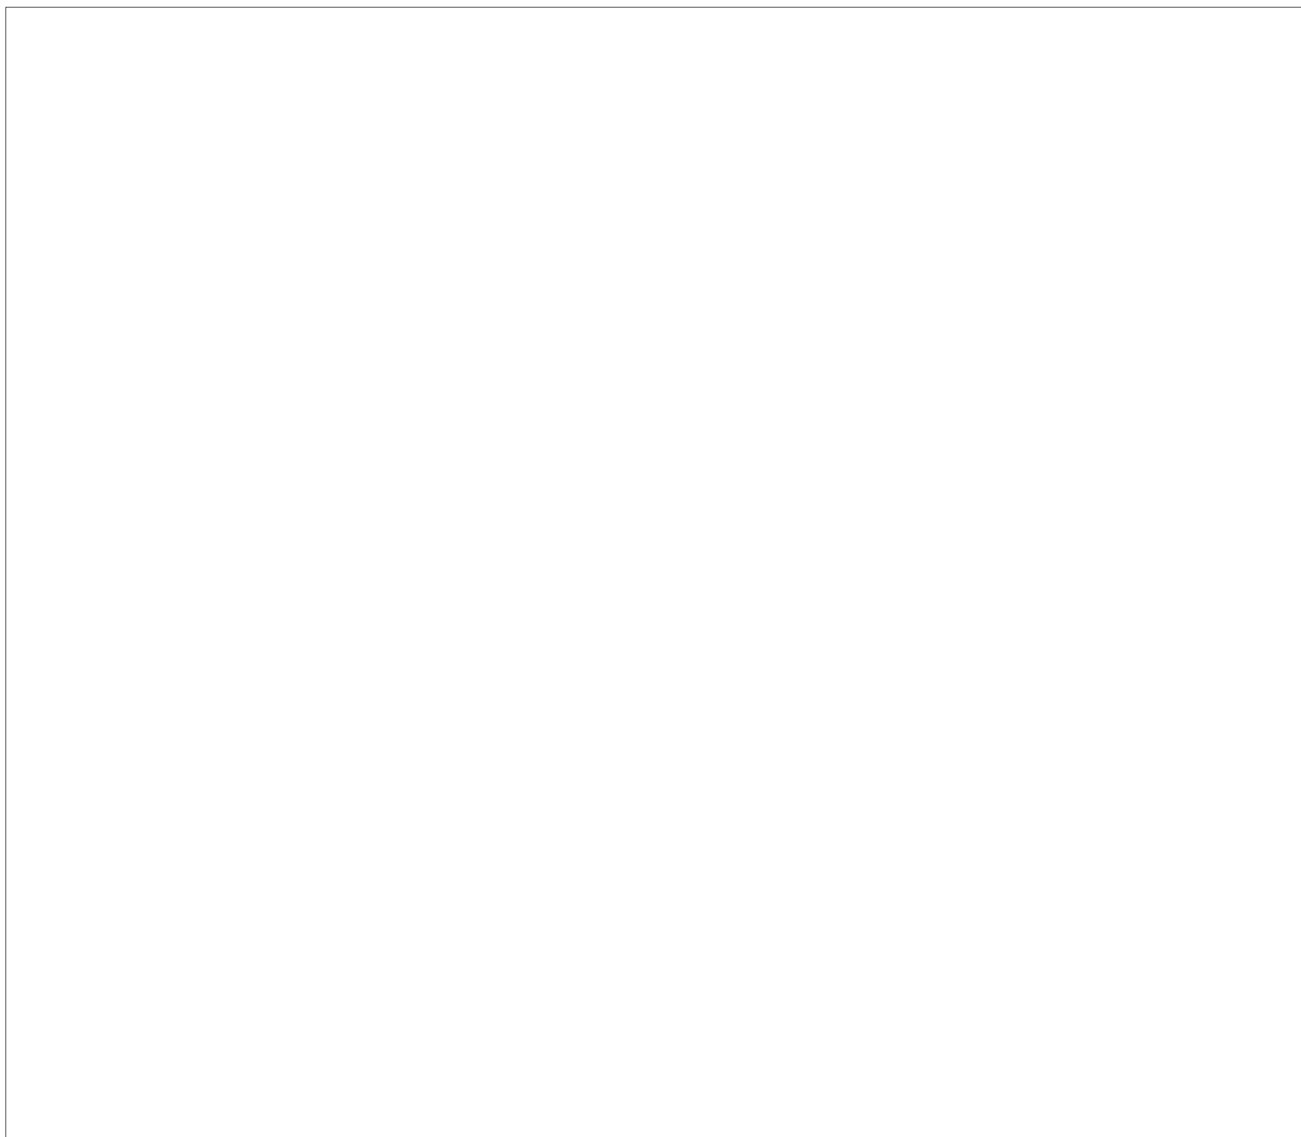

Director of Security

SUBJECT: Office of Security Significant Activities
Week of 1 - 8 July 1987

1. This memorandum is for information only.

2. The activities of the Office of Security (OS) during the week of 1 - 8 July 1987 were highlighted by the following items:

25X1

S E C R E T

d. The Security Programs (Version 5.0) for Personal Computers, developed by OS Information Systems Security Division, is ready for distribution to Agency users. The disk contains overwrite utilities, security print features, and PC users guide software. []

g. The attendees of the 31st Security Officers Training Program, one of the largest classes in OS history, is currently involved in [] which concludes on 13 July 1987. The class begins the concluding phase of training, [] Training Course, on 14 July and graduates on 12 August 1987. []

h. An OS representative attended the first off-site meeting of the Subcommittee on Automated Information Systems Security (SAISS), held at the Maritime Institute of Technology, Linthicum, Maryland. The purpose of the meeting was to set the direction of the Subcommittee for the coming year and consider what the SAISS and U.S. Government should be doing in terms of automated information systems security. Results will be reported to the National Telecommunications and Information Systems Security Committee (NTISSC). []

i. OS representatives continue to provide consultative support to the Defense Intelligence Agency (DIA) for evaluation of the DIA SAFE system. OS personnel are participating as [] members to evaluate the security posture of the DIA SAFE system. []

* Items which may be of interest to the DCI.

5. Chief, ISSD attended the first retreat of the Subcommittee on Automated Information Systems Security (SAISS), held at Maritime Institute of Technology, Linthicum, Maryland. The purpose of the retreat was to set the direction of the Subcommittee for the coming year and consider what the SAISS and U.S. Government should be doing in terms of automated information systems security. The results of the retreat will be reported to the National Telecommunications and Information Systems Security Committee (NTISSC).

6. The Security Programs (Version 5.0) for Personal Computers developed by ISSD, are now ready for release and will be made available to Agency users. The disk contains overwrite utilities, security print features and PC users guide software.

25X1

8. The Agency and Community Systems Branch (A&CSB) continues to receive requests for Summer-Only employees to access Agency word processing systems. Most requests are being approved, however, several requests have been denied. These denials are based on either the word processing system contains data classified higher than Secret or is linked to an Agency mainframe system. Two approvals were rescinded upon conducting a security audit, and it was discovered that the systems were linked to VM.

9. A&CSB continues to provide consultative support to the Defense Intelligence Agency for evaluation of DIA SAFE. A&CSB has provided 40% of the work hours of two staff members over the past two weeks. An additional A&CSB staff member will join the team primarily for the purpose of training and experience in [redacted] operations.
